

MIDNIGHT MAFIA · OPERATIONS

CUTTER

Crew Guide & Setup

EVERY CUT ACCOUNTED FOR

THE BASICS

WHAT IS CUTTER?

A Discord bot that **tracks every operation** — who farmed, funded, cooked, and sold — and **splits the haul fair, automatically.**

- Log the whole op in its own channel — deposits, cooks, and sales
- Settle pays out by **capital, work, rank, and selling risk** — to the dollar
- Every payout is **on the record** in a read-only archive — no disputes

THE SPLIT

FOUR WAYS TO GET PAID

① Capital back

Front materials or cash —
reimbursed in full before any profit.

② Work - 70%

Farm, fund, or cook. Paid by what
you put in.

③ Rank - 30%

Your level in the chain, read from
your Discord role.

④ Commission

Hazard pay for moving product — you
hold the heat.

Big take-home numbers are mostly your own capital coming back — the payout shows capital vs. earned separately.

HOW SETTLE THINKS

THE SETTLEMENT WATERFALL

Every **/settle** runs the same order, so the math always ties out:

$$\begin{array}{c} \text{REVENUE} \\ \text{sales} \end{array} - \begin{array}{c} \text{CAPITAL} \\ \text{reimbursed} \end{array} - \begin{array}{c} \text{COMMISSION} \\ \text{to sellers} \end{array} = \begin{array}{c} \text{DISTRIBUTABLE} \\ \text{profit} \end{array}$$

- **Capital first** — everyone's fronted materials & cash come back before profit is touched
- Profit splits **70% Work** (by what you contributed) and **30% Rank** (by your level's weight)
- If a job loses money, no commission — revenue reimburses capital pro-rata, nobody goes negative

ADD CUTTER TO YOUR SERVER

- Open the invite link, pick your server, hit **Authorize**
- Grant **Manage Roles, Manage Channels & Attach Files** — Cutter reads ranks, builds op channels, and posts this deck
- The interactions endpoint is wired once by your admin — already done for this bot

INVITE LINK

discord.com/oauth2/authorize?client_id=1512639038249504768&scope=bot+applications.commands&permissions=268553232

CONFIGURE THE CREW

- `/setup officer:@<role>` — seeds the Honey line, sets who runs privileged commands, and builds the read-only `#cutter-guide` with this deck (*needs Manage Server*)
- `/rank map` — tie each Discord role to a level I-V (Leadership → Associates)
- `/config panel` & `/catalog` — tune labor rate, the 70/30 split, commission, farm margin & prices
- `/recipe` — add cocaine / moonshine / meth once you know the formulas

That's it — the crew can start running ops.

FOR EVERYONE

RUNNING AN OP

Run every command **in the op's channel** – no IDs to type. Each op stays isolated, even two of the same product.

LIVE EXAMPLE

ONE JOB, START TO PAYOUT

Five hands run a Honey batch. We'll follow every command, then watch `/settle` tie **\$220,000** out to the dollar.

WHO	ROLE	RANK	WHAT THEY DO
Marco	Underboss	I · 5×	Funds the bottles — vials & syringes
Rico	Dealer	III · 3×	Funds chems, then sells the product
Vinny	Supplier	III · 3×	Farms the poppy & acetone
Tony	Goon	IV · 2×	Refines, cuts & bottles
Lou	Dealer	III · 3×	Doses the final 1,700 bags

DEPOSITS

Each hand logs what they put in. Cutter values it from the catalog — **that's their capital, reimbursed first.**

Rico	/job open name:Sat Cook product:Honey	opens #sat-cook
Marco	/deposit item:Vial qty:960	+ \$48,000
Marco	/deposit item:Syringe qty:900	+ \$45,000
Rico	/deposit item:Baking soda qty:480	+ \$24,000
Rico	/deposit item:Cleaning kit qty:110	+ \$5,500
Vinny	/deposit item:Poppy qty:600	+ \$12,000
Vinny	/deposit item:Acetone qty:240	+ \$7,200

Capital so far — Marco **\$93,000** · Rico **\$29,500** · Vinny **\$19,200**. (Prices: bought items \$50, poppy \$20, acetone \$30.)

PROCESS & SALE

Cooks log what they **made** at each step — that's their **labor** (units × \$25). Then the product moves.

Tony	/process step:refine made:480	poppy + acetone → powder
Tony	/process step:cut made:960	powder + baking → cut
Tony	/process step:bottle made:900	→ vial heroin
Lou	/process step:dose made:1700	→ 1,700 Honey
Rico	/sale qty:1700 cash:220000	revenue \$220,000

Labor — Tony 2,340 units → \$58,500 · Lou 1,700 → \$42,500. Rico sold it, so he earns 8% commission = \$17,600.

LIVE EXAMPLE · CHECK BEFORE YOU SETTLE

/status

Anyone can pull `/status` to see contributions and whether the books reconcile — **all 1,700 bags sold, nothing left on the shelf.**

CAPITAL IN

\$141,700

LABOR LOGGED

\$101,000

REVENUE

\$220,000

ON HAND

0 bags

- `/me` shows your own line — what you fronted, cooked, and stand to clear
- `/ledger` is the full blow-by-blow if a number looks off
- See product made but not sold? `/status` flags it before you pay out

THE PROFIT POOL

/settle reimburses capital, pays commission, then splits what's left:

LIVE EXAMPLE · THE PAYOUT

EVERYONE PAID — TO THE DOLLAR

MEMBER	RANK	CAPITAL	COMM.	WORK	RANK	NET
Marco	I	93,000	—	16,282	5,691	114,972
Rico	III	29,500	17,600	5,165	3,414	55,679
Vinny	III	19,200	—	3,361	3,414	25,976
Tony	IV	—	—	10,242	2,276	12,518
Lou	III	—	—	7,441	3,414	10,855
TOTAL		141,700	17,600	42,491	18,209	220,000

Marco's big number is mostly his own \$93,000 capital coming back. The channel archives read-only — that's everyone's receipt.

THE HIERARCHY SHARE

RANK CUTS

30% of every job's profit is the **rank pool**, split by your level — auto-read from your Discord role.

I	Leadership — Don · Underboss	5×
II	Consigliere — Captain · Soldier · Warlord	4×
III	Capos — Dealer · Supplier · ...	3×
IV	Enforcers — Goon · Hustler · Hittaz	2×
V	Associates — Runners · Lookouts	1×

SETUP & ECONOMY

— officers

<code>/ping</code>	Health check — Cutter replies it's alive.
<code>/setup officer:@Capo</code>	Seeds the Honey line, sets the officer role, builds #cutter-guide + posts this deck.
<code>/config view</code>	Show every dial — labor rate, 70/30 split, commission, farm margin, weights, prices.
<code>/config panel</code>	Interactive  panel — nudge any dial with buttons, live.
<code>/config set dial:Commission value:8</code>	Set one dial directly.
<code>/rank list</code>	Show the current role → level (I-V) map.
<code>/rank map role:@Capo level:III</code>	Tie a Discord role to a rank level.
<code>/rank unmap role:@Capo</code>	Remove a role's mapping (it falls back to level V).
<code>/rank weights level:I weight:5</code>	Change a level's multiplier in the rank split.

COMMAND REFERENCE · 2 / 4

CATALOG & RECIPES – officers

/catalog list	Every item at its current value — farmed items shown auto-priced from the product.
/catalog add name:Press kit value:50 source:bought	Add a new item to the catalog.
/catalog set item:Vial value:50	Change a base item's price (bought items only — others derive).
/catalog remove item:Press kit	Delete an item — warns if a recipe still uses it.
/recipe line name:Cocaine final:Brick price:1200	Start a product line and its final item + sell price.
/recipe build line:Cocaine	Opens a form, pre-filled with the chain — add, edit, or delete steps; saving replaces it.
/recipe list	All product lines and their steps.
/recipe remove line:Cocaine	Delete a product line and all its steps.

Recipes can build on each other — crack cooks **loose cocaine**, and Cutter values it through the cocaine chain.

RUN A JOB

– everyone, in the op's channel

/job open name:Sat Cook product:Honey	Creates the op its own channel under Operations — commands there need no IDs.
/job list	All open jobs and their channels.
/job close	Close this channel's job without settling — archives it read-only.
/job reopen	Officers: bring a settled job back to fix it, then /settle again.
/deposit item:Vial qty:960	Add materials to the pool (valued from the catalog) — or cash: for money.
/process step:refine made:480	Log a cook — report units you made ; that's your labor.
/settle	Opener or officer: run the waterfall, post payouts, archive the channel.

MONEY & TRACKING

<code>/sale qty:1700 cash:220000</code>	Log a real-cash sale — seller earns commission. Add by:@member if someone else sold.
<code>/withdraw item:Honey qty:50</code>	Pull product or cash : back out — valued and deducted from your net.
<code>/status</code>	Contributions per member + reconciliation: capital, labor, revenue, what's on hand.
<code>/ledger</code>	The full blow-by-blow history of the job.
<code>/me</code>	Your own standing — fronted, cooked, sold, and what you'll clear.
<code>/void entry:<pick></code>	Officers: reverse a mistaken entry — logged, never deleted.

Voids and reopens keep the books honest **without erasing history** — the archive always shows what really happened.

WHEN THINGS GO SIDeways

FIXES & HELP

- Wrong number? Officers can `/void` any entry — it's logged, never deleted
- Already settled but need a fix? Officers `/job reopen` → correct → `/settle` again
- Check `/status` before settling — it flags product made but not sold
- Settled channels are **read-only archives** with the full record — that's your receipt

Stuck? Ping an **officer**.

**YOU PUT IN THE WORK.
CUTTER PAYS YOU RIGHT.**

PROFIT · LOYALTY · DISCRETION · FAMILY
