CUTTER

The Contribution Treasury — Crew Guide & Setup

E V E R Y C U T A C C O U N T E D F O R

THE BASICS

WHAT IS CUTTER?

Our bookkeeper. It tracks **every bit of work the crew puts in** — farming, funding, cooking, selling — and pays everyone right on payday. **No jobs to open or close** — the operation never stops, and neither do the books.

- Log work as you do it, in the stash-house channel you're working in
- Your tab builds all cycle — work paid at its value, profit split by rank on top
- Handoffs are safe: credit follows whoever did the work, not whoever's carrying it
- Everything's logged, nothing's hidden — if a number looks off, the ledger shows who and when

WHERE YOU WORK

THE STASH HOUSES

Four channels mirror the real shelves. **Run commands in the house you're working in** — the channel tells Cutter which house you mean.

RAW HOUSE

Raw materials — what's farmed and the supplies we buy.

/deposit · /buy

PRODUCT HOUSE

Everything cooked — half-steps to finished product.

/process · /checkout · /return

MONEY HOUSE

The cash — sales land here, advances come out of here.

/sale · /fund-cash

TREASURY

The books — tabs, the fund, and payday.

/status · /owed · /payout

Total product = the houses + what's checked out in members' hands. Nothing's double-counted.

THE SPLIT

TWO WAYS YOU GET PAID

① Work – paid at its value

Capital back – cash & bought supplies you fronted, in full. **Farm pay** – the value of what you farmed. **Cook pay** – a set rate per unit processed. **Commission** – a cut of every sale you make. Whatever your rank.

② Rank cut of the fund

After all work is paid, the profit left is the **fund** – split purely by rank (5/4/3/2/1) among everyone who contributed this cycle. You've got to be in the cycle to share it.

The books run in **cycles**. Your tab builds as you work; an officer's **/payout** is **payday** – everyone's tab + rank share, then a fresh cycle. Inventory stays put; only the tally resets.

SERVER OWNER · STEP 1

ADD CUTTER TO YOUR SERVER

- Open the invite link, pick your server, hit **Authorize**
- Grant **Manage Roles, Manage Channels & Attach Files** — Cutter reads ranks, builds the house channels, and posts this deck
- The interactions endpoint is wired once by your admin — already done for this bot

INVITE LINK

discord.com/oauth2/authorize?client_id=1512639038249504768&scope=bot+applications.commands&permissions=268553232

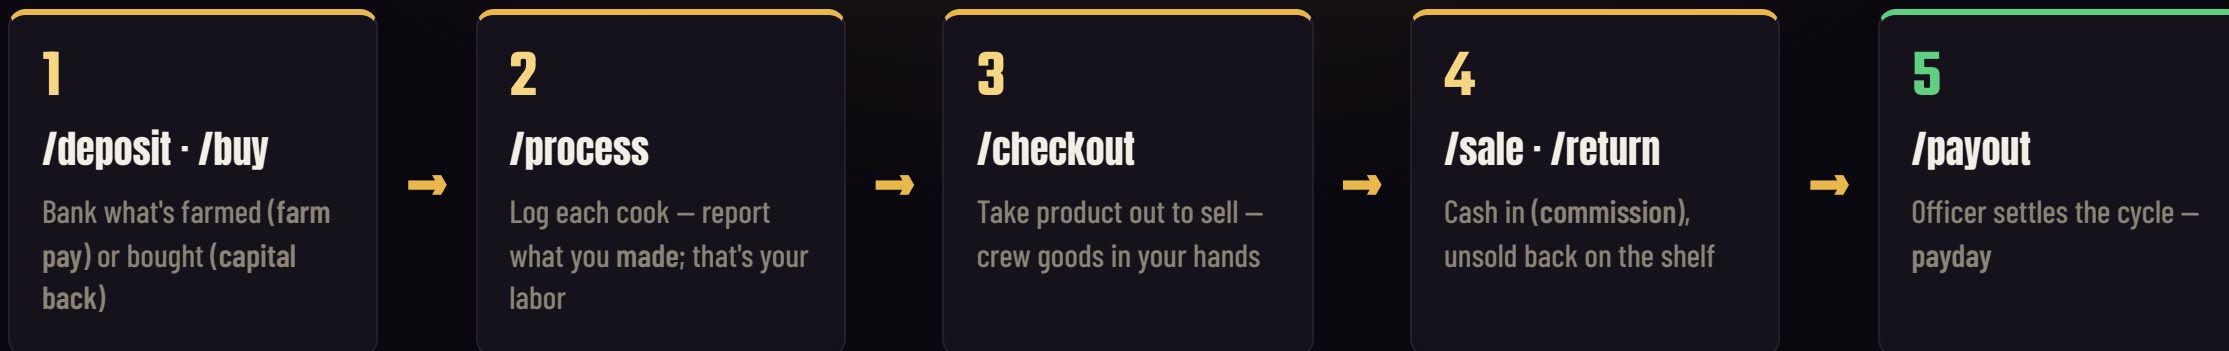

OPEN THE TREASURY

- `/setup officer:@<role>` — builds `#raw-house` · `#product-house` · `#money-house` · `#treasury` + the read-only `#cutter-guide` with this deck, seeds the Honey line, and opens cycle 1 (*needs Manage Server; re-run any time — it rebuilds anything deleted*)
- `/rank map` — tie each Discord role to a level I-V (Leadership → Associates)
- `/config panel` & `/catalog` — tune labor rate, commission, farm margin & prices
- `/recipe` — add cocaine / moonshine / meth once you know the formulas

That's it — the crew logs work the moment the houses exist.

FOR EVERYONE

LOG WORK AS IT HAPPENS

No opening, no closing, no IDs — just **work and log it in the right house**. Days, handoffs, people coming and going: the tab keeps score.

THE TWO RULES THAT KEEP IT FAIR

CREDIT & CATALOG

CREDIT FOLLOWS THE DOER

Banking poppy someone handed you at the border? `credit:@who` pays the farmer, not the carrier:

`/deposit item:Poppy qty:600 credit:@Vinny`

`/process line:Honey step:refine made:480 credit:@Tony`

`/sale product:Honey qty:1700 cash:220000 by:@Rico`

EVERYTHING AT CATALOG

No price to type on `/buy` — Cutter values it at the catalog and you get that back off the top. Snagged a deal or overpaid on your own? That's yours — the crew reimburses catalog, no more, no less.

`/buy item:Vial qty:200 → capital $10,000`

`/fund-cash amount:25000 → cash capital`

Farmed materials are auto-priced from the product so the crew always keeps its margin — officers tune it with `/config`.

TAKING PRODUCT OUT

CHECKOUT, SELL, RETURN

Product leaves the shelf in someone's hands before it's sold. **Checking out isn't taking it for yourself** — it's crew product in your custody, and it doesn't touch your pay.

Rico /checkout **product:Honey qty:200**

holding 200 for the crew

Rico /sale **product:Honey qty:150 cash:18000**

sells from his holding first

Rico /return **product:Honey qty:50**

50 back on the shelf — squared ✓

- It has to square: $\text{out} = \text{sold} + \text{returned}$ — **/holding** shows what anyone still has out
- Got jacked on the run? Log a **/loss** — it can come off your holding, not just a house

LIVE EXAMPLE

ONE CYCLE, START TO PAYDAY

Four hands work a Honey cycle. We'll follow every command, then watch `/payout` hand out \$75,000 to the cent.

WHO	ROLE	RANK	WHAT THEY DO
Marco	Underboss	I · 5×	Buys 200 vials with his own cash
Vinny	Supplier	III · 3×	Farms 600 poppy — hands it off to Marco to bank
Tony	Goon	IV · 2×	Cooks 480 units through the chain
Rico	Dealer	III · 3×	Checks out the product & sells \$80,000

Mid-cycle, Vinny flies out and needs cash — we'll watch the `advance` square itself up at payday.

LIVE EXAMPLE · ① LOG THE WORK

EVERYBODY'S TAB BUILDS

Marco	 raw-house	/buy item:Vial qty:200	capital \$10,000 (catalog \$50)
Marco	 raw-house	/deposit item:Poppy qty:600 credit:@Vinny	farm pay \$12,000 → Vinny
Tony	 product-house	/process line:Honey step:refine made:480	labor \$12,000 (480 × \$25)
Rico	 product-house	/checkout product:Honey qty:1700	holding 1,700 — no tab effect
Rico	 money-house	/sale product:Honey qty:1700 cash:80000	commission \$6,400 · holding squared

Marco carried Vinny's poppy in, but **credit:** paid the man who farmed it. Earned so far — Marco \$10,000 · Vinny \$12,000 · Tony \$12,000 · Rico \$6,400 = \$40,400.

LIVE EXAMPLE · ② NEED CASH BEFORE PAYDAY?

THE ADVANCE

Vinny's heading out of the city and wants something now. He doesn't wait for the cycle — an officer fronts him against **what he's already earned**.

Vinny

 treasury

/owed

earned \$12,000 · advanceable \$12,000

Officer

 treasury

/advance member:@Vinny amount:5000

money house -\$5,000 · logged

- Capped at what you've earned minus what you've already taken — never against the unknown rank share
- It reconciles itself at **/payout** — no IOUs, no arguments
- Money house now holds **\$75,000** (\$80,000 sales – \$5,000 advanced)

THE FUND

/payout pays every tab at its value, and whatever profit is left — **the fund** — splits by rank:

MONEY HOUSE
\$75,000

-

STILL OWED FOR WORK
\$35,400

=

THE FUND
\$39,600

SPLIT BY RANK AMONG THIS CYCLE'S CONTRIBUTORS — WEIGHTS 5+3+2+3 = 13

\$3,046 per weight point

- Owed = \$40,400 earned – \$5,000 already advanced to Vinny
- Contributing is the ticket in; rank sizes the slice. Sat the cycle out? No cut.

EVERYONE PAID — TO THE CENT

MEMBER	RANK	WORK PAY	RANK CUT	ADVANCED	HANDED
Marco	I · 5×	10,000	15,231	—	25,231
Vinny	III · 3×	12,000	9,138	−5,000	16,138
Tony	IV · 2×	12,000	6,092	—	18,092
Rico	III · 3×	6,400	9,138	—	15,538
TOTAL		40,400	39,600	−5,000	75,000

The money house empties to exactly what's handed out — **the books carry the pennies**. The full cycle record posts to **#treasury**, cycle 2 opens, inventory stays on the shelves, and the tally starts fresh.

THE HIERARCHY SHARE

RANK CUTS

The whole fund splits by your level — auto-read from your Discord role. **Everyone earns for their work; the bosses earn a bigger slice of the profit.**

I	Leadership — Don · Underboss	5×
II	Consigliere — Captain · Soldier · Warlord	4×
III	Capos — Dealer · Supplier · ...	3×
IV	Enforcers — Goon · Hustler · Hittaz	2×
V	Associates — Runners · Lookouts	1×

WHEN IT GOES WRONG

BUSTED OR ROBBED

A house gets raided, you get jacked leaving a deal, product spoils. **Log it the second it happens** so the books stay honest:

Anyone /loss cause:busted item:Honey qty:200

off the shelf, on the record

Anyone /loss cause:robbed cash:50000 note:hit leaving the deal

cash gone, logged

- **Crew-shared by default** — it comes out of the profit, everyone's cut takes a small hit
- Clearly on one person? An officer adds **charge:@member** — it comes off **their** cut, not the crew's
- **Nobody ever ends up owing** — a catastrophic loss spreads what's left, no one goes negative
- Got it back? An officer **/void**s the loss and the stock's restored

SETUP & ECONOMY

— officers

<code>/ping</code>	Health check — Cutter replies it's alive.
<code>/setup officer:@Capo</code>	Builds the four houses + #cutter-guide with this deck, seeds Honey, opens cycle 1. Re-run to repair deleted channels.
<code>/config view</code>	Show every dial — labor rate, commission, farm margin, weights, prices, current cycle.
<code>/config panel</code>	Interactive  panel — nudge any dial with buttons, live.
<code>/config set dial:Commission value:8</code>	Set one dial directly.
<code>/rank list</code>	Show the current role → level (I-V) map.
<code>/rank map role:@Capo level:III</code>	Tie a Discord role to a rank level.
<code>/rank unmap role:@Capo</code>	Remove a role's mapping (it falls back to level V).
<code>/rank weights level:I weight:5</code>	Change a level's multiplier in the fund split.

CATALOG & RECIPES

– officers

<code>/catalog list</code>	Every item at its current value — farmed items shown auto-priced from the product.
<code>/catalog add name:Press kit value:50 source:bought</code>	Add a new item to the catalog.
<code>/catalog set item:Vial value:50</code>	Change a base item's price (bought items only — others derive).
<code>/catalog remove item:Press kit</code>	Delete an item — warns if a recipe still uses it.
<code>/recipe line name:Cocaine final:Brick price:1200</code>	Start a product line and its final item + sell price.
<code>/recipe build line:Cocaine</code>	Opens a form, pre-filled with the chain — add, edit, or delete steps; saving replaces it.
<code>/recipe list</code>	All product lines and their steps.
<code>/recipe remove line:Cocaine</code>	Delete a product line and all its steps.

The treasury runs **every line at once** — that's why `/process` names its **line:** and `/sale` names its **product:.** Recipes can build on each other — crack cooks **loose cocaine**, valued through the cocaine chain.

LOG YOUR WORK

— everyone, in the house you're in

/deposit item:Poppy qty:600 credit:@Vinny	Bank materials — farm pay to whoever did the work (default: you).
/buy item:Vial qty:200	Bought with your own cash — capital at catalog value, owed back.
/fund-cash amount:25000	Front the treasury cash — capital, owed back at payday.
/process line:Honey step:refine made:480 credit:@T	Log a cook — pulls inputs, adds product, pays labor per unit made.
/transfer item:Cut heroin qty:400 to:#product-house	Move stock between houses — logistics only, no pay effect.
/checkout product:Honey qty:200	Take product out to sell — crew goods in your holding , no tab effect.
/sale product:Honey qty:150 cash:18000 by:@Rico	Real-cash sale — draws the seller's holding first; commission to them.
/return product:Honey qty:50	Unsold product back on the shelf — out = sold + returned.

MONEY & PAYDAY

<code>/owed [member:@Vinny]</code>	A live tab — earned this cycle, advances taken, advanceable right now.
<code>/advance member:@Vinny amount:5000</code>	Officers: hand cash now against what's earned — squares up at payday.
<code>/payout</code>	Officers: payday — pay every tab + split the fund by rank, post the record, open the next cycle.
<code>/fund</code>	The fund right now — cash on hand, what's owed for work, the profit on top.
<code>/spend amount:3000 reason:bribes</code>	Officers: crew expense — logged, comes out of the fund.
<code>/withdraw item:Honey qty:50 · /withdraw cash:2000</code>	Personal use — valued and off your tab at payday.
<code>/loss cause:busted item:Honey qty:200</code>	Anyone — busted/robbed/spoiled goods or cash. holder:@m hits a holding; officers add charge:@m .
<code>/void entry:<pick></code>	Officers: reverse a mistaken entry — also how a recovered loss comes back.

THE BOOKS

<code>/me</code>	Your standing this cycle — tab, rank, what you're holding, what's advanceable.
<code>/holding [member:@Rico]</code>	Product members have checked out — every run has to square.
<code>/stash [house:raw]</code>	What the books say is on a shelf (defaults to the channel you're in).
<code>/status</code>	The whole treasury — cash, the fund, every house, this cycle's contributors.
<code>/ledger</code>	This cycle's blow-by-blow — who did what, when.
<code>/reconcile item:Poppy count:480</code>	Officers: log a real shelf count — records shrinkage vs the books.

Total product = houses + holdings, so nothing's double-counted. Books off from the shelf? `/reconcile` pins reality and keeps the diff on record.

WHEN THINGS GO SIDeways

FIXES & HELP

- Wrong number? Officers can `/void` any entry this cycle — it's logged, never deleted
- Loss came back? `/void` the loss entry — stock and cash are restored
- Shelf doesn't match the books? `/reconcile` pins the real count and records the shrinkage
- A house channel got deleted? `/setup` again — it rebuilds whatever's missing
- Every payday posts the **full cycle record** to #treasury — that's everyone's receipt

Stuck? Ping an **officer**.

**YOU PUT IN THE WORK.
CUTTER PAYS YOU RIGHT.**

PROFIT · LOYALTY · DISCRETION · FAMILY
