

MIDNIGHT MAFIA · CUTTER

RANK CUTS

Every job's profit splits two ways: **70% rewards the work** you put in, and **30% is the rank pool** — divided by your level in the chain, read straight from your Discord role. Here's how that rank pool breaks down.

70%

WORK SHARE — BY CONTRIBUTION

30%

RANK POOL — BY LEVEL ↓

THE RANK POOL, BY LEVEL

LVL	TIER	WEIGHT	SHARE OF POOL*
I	LEADERSHIP Don · Underboss	5×	33%
II	CONSIGLIERE Captain · Soldier · Warlord	4×	27%
III	CAPOS Ambassador · Corner Boss · Street Soldier · Dealer · Supplier	3×	20%
IV	ENFORCERS Hittaz · Goon · Hustler	2×	13%
V	ASSOCIATES Runners · Lookouts	1×	7%

For every **\$1** of the rank pool an Associate earns, a Don earns **\$5**.

* **About the percentages:** shares shown assume one member of each level on the run. Your real slice = **your weight ÷ the total weight of everyone on that job**, so it shifts with who's on hand — fewer top ranks present means a bigger slice for everyone below. The 70 / 30 split and these weights are crew-configurable.
